

ESSENTIAL SERVICES FUELED
BY **ZERO EMISSION POWER**

DANNAR 3.00

The DANNAR is the most complete maintenance and disaster response platform on the market today, providing year-round infrastructure and off-road maintenance, disaster response, and supplemental mobile micro-grid export power.

Built on a heavy-duty steel ladder frame, the DANNAR can easily be equipped with an optional open operator cab platform equipped with a joystick, foot pedal and touchscreen tool control. Base model comes standard with a flat bed and universal quick attach mounting plates that can receive any standard Cat®, Bobcat® or John Deere® attachments.

FEATURES

- Standard with two 33 kWh BMW i3 Li-Ion battery packs (66 kWh total)
 - *Optional upgrade for a total of 132 kWh on-board electricity*
- Export panel is configurable with multiple 110VAC and 208VAC outlets, (optional 480 & 240 available)
- Platforms for heavy-duty emergency supply delivery
- Four-wheel drive and four-wheel, multi-mode steering
- Full-time 4X4 electric drive with regenerative braking
- Type I, II and III hydraulic tool circuits, Variable flow & pressure
- Maintenance support system augmented by Ruggedized ODG R-7 Smartglasses
- Solar charging stations can be integrated to provide extended off-grid energy independence and energy resilience with energy storage, export, and vehicle fast charging capability
- Options for fully remote, operator platform or climate-controlled operator cab
