

ENERGY ON WHEELS

DANNAR PRICE 3.00 & 4.00

DD DANNAR, LLC is a company utilizing research and technology resulting in the creation of innovative and disruptive products.

Gary Dannar founded DD DANNAR, LLC believing that people and the community they live in are the most vital part of any business. For over 30 years, he heard fleet managers stress the need to do more with less. In response, DD DANNAR, LLC has built a fully customizable platform that users can change at any time, for any job rather than being limited by single-purpose machines. In doing so, DD DANNAR, LLC has revolutionized the off-road equipment manufacturing industry by designing and commercially producing the first ever electric powered off-road machine.

**Designed with lower maintenance requirements than conventional equipment.
Electrification simplifies operation and reduces preventive maintenance.**

DANNAR 3.00

- **Base Price \$187,750**
- Two 33 kWh BMW i3 Li-ion Battery Packs
- UQM 950T Electric Traction Motor
- Dana 212 Planetary Drive Axles with Three Models of Steering
