Mobile Power Station (MPS) on Capitol Hill Tuesday, November 13th

MUNCIE, INDIANA – The DANNAR team provided a demonstration of the Mobile Power Station on Capitol Hill, South Capitol Street SE on Tuesday, November 13, 2018.

The Mobile Power Station provides significant new capability for first responders at the state and federal level in times of crisis and disaster. The Mobile Power Station clearly meets the multiple needs and requirements of military and first responders to get back to work and to provide energy resilience.

Founder & CEO Gary Dannar said, “We were proud to be on Capitol Hill with the Mobile Power Station. In addition to the MPS providing great cost-effective flexibility to multiple industries, we strive to support Central Indiana job creation, and to attract important new investment to our communities. The electrification of heavy equipment starts in Indiana.”

Highlighting the evolution of heavy-duty, off-road work equipment from diesel power to electrification, DANNAR’s demonstration highlighted the DANNAR 4.00 base model MPS, which comes standard with three 42 kWh BMW i3 Li-Ion battery packs (126 kWh total) and can be easily upgraded with up to nine additional packs for a total of 504 kWh of on-board electricity. Built on a heavy-duty steel ladder frame, the MPS can be ordered with or without a cab, or operator platform, and is designed with dual flat beds to accommodate a range of work functions from adding scissor lifts, forklift masts, or dump beds, to water tanks, electric water pumps,

ABOUT DANNAR

DANNAR is an Original Equipment Manufacturer (OEM) of an entirely new type of mobile, off-road energy platform for commercial and governmental fleets. Located in Muncie, Indiana, DANNAR Mobile Power Stations® are the first all-electric, heavy-duty equipment to utilize a componentized modular design and the MPS is the first in a “new class” of electric work machines for all types of fleets. DANNARs provide year-round versatility for work in all areas of infrastructure maintenance, rapid response to disasters and emergency situations, and can supply on-demand, supplemental off-grid power. More information on DANNAR and the Mobile Power Station can be found on the company’s website at www.dannar.us.com
